

RES-Q-VAC

Manual suction pump

RES-Q-VAC is a suction device designed to collect non inflammable substances of only medical origin.

RES-Q-VAC is an easy to use portable suction device particularly indicated for emergency situations; it does not require any power supply and it can be operated using the hands, knees or feet. It is used to free the patient's airways rapidly, safely and reliably.

All of its components are easy to remove and wash: RES-Q-VAC can be completely autoclaved. The accurate connections and the robust structure guarantee a long life span.

The intervention on the device on behalf of the patient is not to be considered.

Technical details

Dimensions	120x225x170
Weight	1.3 kg
Max. vacuum	-300 mmHg/ -400 mbar
Average flow	22 L/min
Volume of collection jar	380 ml
